SLiM Program Overview

- Science and Leadership in Medicine (SLiM) is an 8-week virtual (zoom) program that exposes high school and undergraduate students to various careers in medicine and science.
- SLiM Leadership employs its network of hospital administrators, faculty, trainees, and medical students at Weill Cornell and beyond to facilitate medicine and science exposure, and promote leadership development.
- Students will work with physicians and scientists from a variety of fields in order to gain a deeper understanding of the day-to-day duties required of a doctor.
- SLiM provides mentorship opportunities to facilitate the development of professional relationships needed to provide guidance and support for our students' academic endeavors, while inspiring interest in careers in medicine and science.
